This class introduces an overview on nonverbal communication skills in vocal, gesture, eye contact and visual aids. Students gain self-confidence in applying these skills in speeches (show and tell, telling jokes/riddles, presenting current events and running for class president). ## Money & Wealth Principles for Kids

Teaching kids about money has been left out of the school education system, and according to many magazine articles, home education also. People wonder why every generation has to reinvent the wheel on money and success? Is there a secret to success? This course has been designed to give your child a head start towards good habits that lead to their success. Children will learn the essentials of money and economics which helps them understand how the world works around them. They will learn motivating and empowering "principles of wealth" tools, which sets them up with the right mindset to achieve their dreams and goals. They learn about earning, saving, spending, careers, and successful attitudes. We'll play fun games and learn from hands on experience. You will give your child the education with an entrepreneurial perspective that will greatly benefit their future. Grades 2-7.

### Please Note:

- Instructor: Sarah DuVon, Seven Summits Education.
- Class held at Community Center.
